

Custom Fabric Wrap Guidelines

Fabric requirements: Must be a plain weave type fabric (no synthetics) in cotton or cotton/poly blend (quilting fabrics work best). This fabric goes under the fiberglass veil so some colors may go translucent (especially whites that are woven versus printed in an opaque ink) and others may go darker. Get a sample of the fabric wet to get an idea of how it will look on your shaft.

General Quantities Required:

Model	Part	Fabric Dimensions	Suggested Yardage
Pro Stick or SST Oar	Shaft	4.25" W x 6' L *	2 + yards (see Note)
MX Oar	Shaft	7.25" W x 6' L *	2 + yards (see Note)

***NOTE:** Estimated length of fabric for a shaft wrap:

Total Oar/Paddle Length – 2 feet = Length of fabric needed

(More is needed for linear patterns, so error on the longer side.)
